🐙 github.com/sangrammohapatra

Front-end engineer with 2+ years of experience building scalable, component-driven React and TypeScript applications for enterprise clients. Proficient in Material UI, React Hook Form, Axios, TanStack React Query, and Vite — delivering performant, accessible UIs across multi-client product rollouts. Proven collaborator with UX, backend, and product teams.

Skills

- **Frontend** React (Hooks, Functional Components), TypeScript, JavaScript (ES6+), Material UI (MUI), React Hook Form, Redux, Axios, react-i18next, HTML5, CSS3, Responsive Design
- **Build & Quality:** Vite, ESLint, Prettier, Lazy Loading, Code Splitting, Unit Testing, Git
- **Backend:** Node.js, Express.js, REST APIs, MongoDB
- **Tools:** Figma, SAP BTP, SAP S/4HANA, Agile/Scrum

Education

B.Tech — Information

Technology 9.02 CGPA [2023]

- Odisha University of Technology and Research, Bhubaneswar

Achievements

- **High-Impact Squad Award** — Recognized for outstanding team collaboration and measurable contribution to business growth.
- **Customer Success Champion** — Recognized for delivering superior customer satisfaction and retention outcomes.
- **The Innovator** — Recognized for introducing innovative solutions that drove business growth and operational efficiency.

Experience

Software Engineer | **Incture Technologies** January 2023 – Present

Sales Order Automation (SOA) — Enterprise SAP-Integrated Product

- **Architected** the React + TypeScript + MUI frontend for an end-to-end PO→SO automation platform integrated with SAP S/4HANA, reducing manual order processing effort by ~60% across 3 enterprise client deployments.
- **Implemented** multi-language support (react-i18next) across the full application, enabling localization for international enterprise clients with zero content regression.
- **Optimized** frontend performance using lazy loading, code splitting, and Redux state management — reducing page load times by ~35%; monitored bundle size using Vite build analysis tooling.
- **Spearheaded** client-facing requirement workshops and rollouts for 3 enterprise clients, delivering zero critical post-go-live defects through rigorous design-to-production implementation.

Supplier Collaboration Portal (SCP) — Procurement & Quality Platform

- **Delivered** modular, reusable MUI component sets covering supplier onboarding, sourcing workflows, production tracking, QC dashboards, and operational reporting — contributing to 1 successful enterprise client delivery.
- **Streamlined** QC inspection workflows by building a configurable checklist engine in React, eliminating ~80% of manual quality logging for the client's production team.
- **Collaborated** with product and UX teams in Figma-driven design sprints, ensuring accurate and user-friendly implementation and consistent design system adherence across the portal.

Team Leadership & Code Quality

- **Conducted** structured code reviews for 4–5 engineers, enforcing TypeScript best practices, ESLint/Prettier standards, component reusability patterns, and scalable frontend architecture guidelines.
- **Mentored** 2 junior developers on React Hooks, functional component patterns, and unit testing practices, reducing onboarding ramp-up by ~30%; participated actively in Agile sprint ceremonies.

Projects

NyayaSetu — AI-Powered Legal Document Platform · React · TypeScript · MUI · Node.js · MongoDB · Claude API

- Built a full-stack React + TypeScript PWA using MUI components and React Hook Form for structured data collection; integrated react-i18next for multi-language support and Zustand for client state management.
- Engineered a Node.js/Express.js backend with Axios-driven API integrations (eCourts, Twilio, Razorpay, AWS S3), Redis-backed Bull.js queues, AES-256 encryption, OTP-based JWT auth, and real-time SSE streaming — deployed on Railway + Vercel behind Cloudflare CDN.
